No. 33001/101

The Royal Thai Embassy presents its compliments to the Ministry of Foreign Affairs of the Republic of the Union of Myanmar and has the honour to inform the latter that the Chulabhorn Research Institute (CRI) is organising 2 training courses in the field of "Environmental Toxicology and risk Health" during 19 – 28 June 2024. These courses provide participants with a background of the major groups of toxic substances encountered by man and animals through food and the environment, as well as through exposure at the workplace. These toxicants include toxic substances in air, water and soil; solvents; gases; pesticides; hazardous wastes and other pollutants. The course focuses on the chemistry, fate and distribution in the environment, mechanisms of their action, toxic manifestation in living organisms, as well as toxic syndrome in human beings. The details of the training courses and application form appear in attachments).

In this connection, the Embassy would highly appreciate it if the Ministry could kindly coordinate with the Myanmar authorities concerned for the abovementioned training courses. The applicants have to submit duly completed application forms and relevant documents (hard copy) to the Embassy and scanned files sent to email envtox@cri.or.th, thaiembassygn@gmail.com, and wuthikiat.c@mfa.go.th before 22 March 2024. For further inquiries, kindly contact envtox@cri.or.th.

The Royal Thai Embassy avails itself of this opportunity to renew to the Ministry of Foreign Affairs of the Republic of the Union of Myanmar the assurances of its highest consideration.

International Training Course on Environmental Toxicology and Health	June 24 - 28

Course Description:

This course provides students and participants with a background of the major groups of toxic substances encountered by man and animals through food and the environment, as well as through exposure at the workplace. These toxicants include toxic substances in air, water and soil; solvents; gases; pesticides; hazardous wastes and other pollutants. The course focuses on the chemistry, fate and distribution in the environment, mechanisms of their action, toxic manifestation in living organisms, as well as toxic syndrome in human beings. The course also provides information on the latest technologies used to study changes and effects in biological systems, e.g. biomarkers, the omics technologies, gene-environment interactions, epigenetics, and transgenic models, and covers environmental health issues such as climate change, and their adverse health effects in humans.

Requirements: Participants should have some basic knowledge of chemistry and the biological/biomedical sciences.

This year, the course will be held back-to-back with the **international conference on Environmental Pollutants and Toxicants Affecting Health: Collaborative Efforts for Improving Quality of Life at the Chulabhorn Research Institute Convention Center, Bangkok, Thailand from June 19-21, 2024**. *Participants interested in attending both the conference and training course will be given special consideration.*

Participants receiving travel fellowships to attend the conference will be required to give a short presentation (platform or poster) on Environmental Health issues of concern in their country, based on evidence published by reliable sources, e.g., health or environmental authorities in their country.

Fellowship coverage: The fellowship will cover course fees, round trip airfare (low-cost economy class), accommodation allowance, daily stipend, training materials, and health insurance. ✓
